Summary

A Full-Stack Software Developer with 2+ years of experience delivering scalable, workflow-driven web applications using React.js, Next.js, Angular, and .NET Core, with growing expertise in AI-integrated products and workflow automation. Skilled in designing state-driven UIs, building high-performance REST APIs, and implementing secure JWT-based authentication systems. Experienced in integrating LLM APIs (Groq) and building automation pipelines with n8n to power AI-driven features. Proficient in Azure and Vercel deployments, CI/CD pipelines with Jenkins, and relational databases including MSSQL and PostgreSQL. Proven ability to collaborate directly with clients and cross-functional teams in Agile/Scrum environments to ship production-grade solutions on time.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Java

Frameworks/Technologies: React.js, Next.js, Angular, Node.js, Redux, .NET Core, REST APIs, Prisma, Tailwind CSS, Bootstrap, ShadCN UI, Jest (Unit Testing)

AI/Automation: Groq API (LLM Integration), Prompt Engineering, n8n Workflow Automation, AI-Generated Content Pipelines

Database: MSSQL, PostgreSQL (Neon), NoSQL

Developer Tools: Visual Studio, VS Code, Postman, Git, GitHub, Jenkins, Docker

Cloud/Deployment: Azure (App Service, Static Web Apps, CORS), Vercel, CI/CD Pipelines

Methodologies: Agile, Scrum, Jira, REST API Design, Role-Based Access Control (RBAC)

Experience

Baxture Technologies Pvt Ltd

February 2024 – Present

Software Developer

Wakad, Pune

- Developed and maintained 4+ production full-stack applications using Next.js, React.js, and .NET Core APIs, reducing front-end and back-end integration overhead by approx.30%.
- Collaborated directly with 5+ clients to gather requirements, define feature scope, and deliver technical solutions aligned with business goals, reducing feedback-revision cycles by 20%.
- Designed and implemented workflow-based enterprise modules handling 10+ complex state transitions and role-based access control (RBAC) for 4+ distinct user roles.
- Built and optimized 15+ RESTful APIs with JWT authentication and layered validation, eliminating unauthorized access incidents and improving API reliability.
- Authored 20+ MSSQL stored procedures, optimized joins and transactions, improving dynamic data retrieval speed by approx.35% across 3+ core modules.
- Integrated ShadCN UI and Tailwind CSS component systems, cutting UI development time by 25% while maintaining responsive, accessible interfaces across all breakpoints.
- Maintained 95%+ on-time sprint delivery across 6+ Agile cycles using Git/GitHub for version control and Jenkins for CI/CD pipeline management.

Projects

Uniform Case Management System (UCMS) | *React.js, Redux, REST APIs, RBAC, JWT, Jest*

- Built a workflow-driven case management system handling 5+ lifecycle stages (creation, review, hearing, appeal, closure) processing 100+ active cases simultaneously.
- Implemented Redux-based state management across 8+ complex transition flows, reducing state-related bugs by approx.40% compared to the initial prototype.
- Designed RBAC for 4+ user roles, securing access to 15+ critical operations and reducing unauthorized action attempts to zero.
- Integrated 10+ RESTful API endpoints for real-time case updates and document tracking, cutting data refresh latency by 35%.
- Wrote unit tests using Jest covering 30+ test cases across critical components and API handlers, improving code reliability and catching regressions early.
- Improved application performance by 45% via lazy loading and optimized rendering, reducing initial load time from 4s to under 2.5s.

IndiaTechPulse | *Next.js, PostgreSQL (Neon), Groq API, n8n, Apify*

- Built a full-stack job-aggregation platform for the Indian tech market, consolidating listings from multiple sources into a unified, searchable feed.
- Integrated Groq’s LLM API to auto-generate concise AI-written briefs for each job listing, improving content scannability for end users.
- Designed n8n automation workflows to handle scraping, data ingestion, and resume-to-job matching, reducing manual data pipeline maintenance.
- Overcame anti-bot restrictions (Cloudflare, Akamai) on major job platforms by evaluating and integrating Apify as a reliable scraping solution.
- Built a companion LinkedIn auto-applier control panel (“Antigravity”) exposing secure API endpoints for automated job applications while keeping core automation logic server-side.
- Deployed on Vercel with PostgreSQL (Neon) as the primary datastore, structuring schema for job listings, skill trends, and user-skill connections.

DocumentCapture by Wingen | *Angular, .NET Core (FastEndpoints), Dropbox Signature API, MSSQL*

- Developed a digital document signing platform processing 500+ documents monthly with zero data loss, enabling secure exchange between clients and service providers.
- Integrated Dropbox Signature API (formerly HelloSign) with full audit trail support, reducing manual document turnaround time by 60%.
- Built 12+ FastEndpoints API routes achieving sub-200ms average response time for document retrieval and status operations.
- Implemented Angular front-end with real-time document tracking and RBAC for 3 user levels; applied AES encryption for all stored documents.
- Optimized MSSQL queries and added API-level caching, reducing average database query time by 30% and improving system throughput.

Ticketing System Application | *Next.js, ShadCN UI, Prisma, PostgreSQL*

- Developed a scalable full-stack ticketing system supporting end-to-end issue tracking and priority-based resolution management.
- Implemented RBAC with separate customer and admin modules — customers create/track/update tickets; admins assign priorities, manage queues, and provide resolutions.
- Integrated ShadCN UI component library for a modern, accessible interface, reducing component build time by 30%.
- Used Prisma ORM with PostgreSQL for type-safe, efficient database operations; designed normalized schema cutting redundant queries by 25%.

Education

Savitribai Phule Pune University	2023 – 2025
<i>Master of Computer Application (MCA)</i>	<i>CGPA: 7.42/10.00</i>
Sant Gadge Baba Amravati University	2020 – 2023
<i>Bachelor of Computer Application (BCA)</i>	<i>Percentage: 84.57%</i>

Certifications

- | | |
|--|---|
| • Full Stack Web Development Course, Udemy | • Diploma in Java, CCIT Amravati |
| • Java Full Stack Development Course, JSpiders Pune | • Certificate in Web Development, Sololearn |
| • Web Development Course, CCIT Amravati | |

Extracurricular Involvement

- Participated in coding competitions on HackerRank and LeetCode, strengthening algorithmic thinking, data structures proficiency, and competitive problem-solving speed.
- Solved challenges across JavaScript, Java, and C++, developing cross-language versatility applicable to full-stack and backend engineering roles.
