Summary

A Software Developer with 2+ years of experience building scalable, workflow-driven web applications using React.js, Next.js, Angular, and .NET. Experienced in designing state-driven UIs, implementing secure authentication systems, and developing high-performance REST APIs. Strong focus on clean architecture, performance optimization, and delivering production-grade solutions in Agile environments.

Technical Skills

Languages: JavaScript, TypeScript, SQL, Java

Frameworks/Technologies: React.js, Next.js, Angular, Redux, .NET, REST APIs, Prisma, Tailwind CSS, Bootstrap

Database: MSSQL, PostgreSQL, NoSQL

Developer Tools: Visual Studio, VS Code, Postman, Git, GitHub, Jenkins

Cloud/Deployment: Azure (basic), Vercel

Methodologies: Agile, Scrum, Jira

Experience

Baxture Technologies Pvt Ltd

February 2024 – Present

Software Developer

Wakad, Pune

- Developed and maintained full-stack applications using Next.js, React.js, and .NET APIs for seamless front-end and back-end integration.
- Collaborated directly with clients to gather requirements, discuss feature enhancements, and provide technical solutions aligned with business goals.
- Designed and implemented workflow-based modules for enterprise applications, handling complex state transitions and role-based access control.
- Built and optimized RESTful APIs, implemented secure authentication with JWT, and enhanced application security through robust validation and error handling.
- Worked extensively with MSSQL for writing stored procedures, joins, and transactions to support dynamic data-driven features.
- Integrated ShadCN UI, Tailwind CSS, and Bootstrap for responsive, accessible, and high-performance user interfaces.
- Used GitHub for version control and collaborated with cross-functional teams under Agile methodology to deliver scalable, production-ready solutions.

Projects

Uniform Case Management System (UCMS) | *React.js, Redux, REST APIs, Role-Based Access*

- Developed a workflow-driven case management system to handle complete case lifecycles including creation, review, hearing, and closure.
- Implemented state-driven UI using Redux to manage complex case transitions and ensure consistent application state.
- Built role-based access control (RBAC) to manage permissions across multiple user roles and secure critical operations.
- Integrated RESTful APIs for real-time case updates, document handling, and status tracking.
- Enhanced performance and user experience through lazy loading, optimized rendering, and efficient state management.

DocumentCapture by Wingen | *Angular 20, .NET Core (FastEndpoints), Dropbox Signature API, MSSQL*

- Developed a digital document signing platform enabling clients and service providers to securely exchange and sign documents online.
- Integrated Dropbox Signature APIs (formerly HelloSign) to streamline digital signature workflows with audit trails and secure storage.
- Implemented backend services using .NET Core with FastEndpoints for high-performance RESTful API development and modular architecture.
- Built a responsive front-end in Angular 20 with real-time updates, document tracking, and role-based access for different user levels.
- Optimized API response times, improved user experience, ensured data security through proper validation and encryption.

PartingOut.com Website | *Angular, .NET Core, REST APIs, MSSQL*

- Developed a responsive and scalable e-commerce platform for vehicle parts management using Angular for the front-end and .NET Core for the backend.
- Implemented RESTful APIs to handle product listings, user authentication, and order processing, ensuring efficient and secure data flow between client and server.
- Worked with MSSQL to design and optimize database schemas and queries for reliable data management and improved application performance.
- Integrated modern UI components for an intuitive shopping experience and ensured performance optimization through lazy loading and API caching.

Ticketing System Application | *Next.js, ShadCN UI, Prisma, PostgreSQL*

- Developed a scalable ticketing system for efficient issue tracking and management. Implemented a role-based access control system with separate modules for customers and admins. Customers can create, track, and update tickets, while admins can manage tickets, assign priorities, and provide resolutions. Integrated ShadCN UI for a modern and intuitive user experience. Used Prisma as an ORM for seamless interaction with PostgreSQL, ensuring efficient database operations and optimized performance.

Education

Savitribai Phule Pune University

Master of Computer Application - MCA

2023 – 2025

CGPA : 7.42/10.00

Sant Gadge Baba Amravati University

Bachelor of Computer Application - BCA

2020 – 2023

Percentage : 84.57

Coursework and Certification

- [Full Stack Web Development Course, Udemy](#)
- Java Full Stack Development Course, JSpiders Pune
- Web Development Course, CCIT Amravati
- Certification of Diploma in Java ,CCIT Amravati
- Certificate in Web Development from Sololearn

Extracurricular Involvement

- Participated in various coding competitions, including contests on HackerRank and LeetCode, enhancing algorithmic thinking and coding speed.
- Utilized a variety of programming languages including JavaScript, Java, and C++ to tackle diverse challenges, enhancing versatility as a developer.
